

Brief: Cybersmart Start Quiz – AS92004v2a

You have been asked to create a computer game to help children become more cybersafe. The game will be in the form of a quiz.

What the program needs to do

- At the start of the game, get the user's name and use their name throughout the game (where appropriate).
- The game is designed for children from 8 to 13 years of age. If the child is older (14 years plus) they should be encouraged to try the **Cybersmart Youth Quiz** instead. **Note:** You do not need to create the Cybersmart Youth Quiz.

Questions and answers

- The program should include at least three questions.
- The questions and their correct answers should be stored in **lists** in your program.
- Examples of questions and answers for the quiz are on the next page.

Scoring

- If the child gets the answer correct the first time, they get one point for the question.
- If they get the answer wrong, they should be encouraged to try again – two more times (ie a total of three tries). If they still can't get it right, they are told the correct answer, and move on to the next question.

Important: They only get a point for a question if they get it correct the **first time** they try.

- At the end of the quiz the child should be given their score (ie the number of questions they got right on their first try).

Note: If you are using EasyGui to create a user interface for the quiz, you can assume that the user will never press the **Cancel** button throughout the quiz.

Cybersmart Quiz Items (Examples)

You can use at least three of the questions below or make up your own questions.

The correct answers are in bold.

Question:	Someone sends you a text that is hurtful and makes you feel bad about yourself. What should you do?		
Answers:	a. Delete the message and try to forget about it	b. Keep the text and show an adult you trust	c. Text the person back saying something mean to them

Question:	You find out that someone has posted an embarrassing picture of you online. What should you do?		
Answers:	a. Tweet that they are an idiot and a loser	b. Ask your friends to give the person a hard time	c. Tell an adult you trust

Question:	You want to join an online gaming site. Which of the following information is okay for you to post on the site.		
Answers:	a. A nickname	b. Your name	c. Your email address

Question:	Someone in your class has posted their first video on YouTube and has asked you to comment on it. You don't think the video is good because the editing is very choppy. What could you comment?		
Answers:	a. Your video is rubbish!	b. Man, this is awful! Stick to playing sport or something.	c. Congrats on your first video! Let me know if you'd like any help editing for your next video.

Question:	Someone in your class is a real bully. Some of the other people in your class say: "Let's get them back, and spam them with random texts." What do you reply?		
Answers:	a. "We shouldn't be mean to them just because they're mean to us."	b. "Yeah, totally. They're evil and deserve it!"	c. "Yes, I think that is a great idea. Maybe they will understand what it feels like, and stop bullying us!"
